Preface	vii
Carol E. Malloy, Series Editor <i>University of North Carolina at Chapel Hill</i>	
Introduction	1
Carol E. Malloy, Series Editor <i>University of North Carolina at Chapel Hill</i>	
1. Enhancing the Learning Environment through Student-Led Mathematical Discussions	7
Fran Arbaugh <i>University of Missouri—Columbia, Columbia, Missouri</i> Patricia L. Avery <i>Rock Bridge High School, Columbia, Missouri</i>	
2. Facilitating Whole-Class Discussions in Diverse Classrooms: Strategies for Engaging All Students	17
Rebecca Mcgraw <i>University of Arizona, Tucson, Arizona</i> David Romero <i>Mountain View High School, Tucson, Arizona</i> Robert Krueger <i>Desert View High School, Tucson, Arizona</i>	
3. Mathematics Instruction and Academic English: Adapting Problems for Varying English Proficiencies	29
Kerry Anne Enright <i>University of California at Davis, School of Education, Davis, California</i>	
4. Help One, Help All	39
Julie Sliva Spitzer (Grades Pre-K–5 Editor) <i>San Jose State University, San Jose, California</i> Dorothy Y. White (Grades Pre-K–5 Editor) <i>University of Georgia, Athens, Georgia</i> Alfinio Flores (Grades 9–12 Editor) <i>University of Delaware, Newark, Delaware</i>	
5. Yes, You Can: Teaming to Support Lower-Attaining Students in Accessing Algebra	49
Sandie Gilliam <i>San Lorenzo Valley High School, Felton, California</i> Megan Staples <i>University of Connecticut, Storrs, Connecticut</i> Jennifer Roberts Lahey <i>San Lorenzo Valley Unified School District, Ben Lomond, California</i>	

Contents — Continued

- 6. Using a “New Synthesis of Reading in Mathematics” to Encourage Disadvantaged High School Students to Act Like a Community of Mathematicians 59**
Janet St. Clair
Alabama State University, Montgomery, Alabama
Jamyé W. Carter
Alabama State University, Montgomery, Alabama
Sibyl Yvette St. Clair
Detroit Public Schools, Detroit, Michigan
- 7. Generating Problems, Conjectures, and Theorems with Interactive Geometry: An Environment for Fostering Mathematical Thinking for All Students 71**
José N. Contreras
University of Southern Mississippi, Hattiesburg, Mississippi
- 8. Egyptian Fractions, a Graphing Calculator, and Rational Functions: 2000 BC Mathematics with 2000 AD Tools 85**
Armando M. Martínez-Cruz
California State University—Fullerton, Fullerton, California
José N. Contreras
University of Southern Mississippi, Hattiesburg, Mississippi
- 9. Moving from Deficiencies to Possibilities: Some Thoughts on Differentiation in the Mathematics Classroom 97**
Mark W. Ellis (Grades 6–8 Editor)
California State University—Fullerton, Fullerton, California
- 10. Why Discourse Deserves Our Attention! 103**
Beth Herbel-Eisenmann
Michigan State University, East Lansing, Michigan
Michelle Cirillo
Iowa State University, Ames, Iowa
Kathryn Skowronski
High School Mathematics Teacher
- 11. Discussions of Mathematical Thinking: Engaging All Students in Learning Mathematics 117**
George W. Bright
University of North Carolina at Greensboro, Greensboro, North Carolina
Jeane M. Joyner
Meredith College, Raleigh, North Carolina
- 12. Learning from One Another: Why and How to Do Classroom Observations with Your Colleagues 127**
Fran Arbaugh
University of Missouri—Columbia, Columbia, Missouri
